All safety instructions describe in detail the potential risks they address and contain precise instructions on how to avoid injury, damage to property or electric shock as a result of improper handling. Please observe the following guidelines:

WARNING

1. Disconnect the appliance from the power supply before carrying out the procedures described.

2. Use protective gloves before starting work.

- Always disconnect the appliance from the power source before carrying out installation work.
- Installation and repairs should be carried out by qualified specialists in accordance with the manufacturer's instructions and the applicable local safety regulations. Therefore, only carry out repairs or replace parts yourself if this is expressly provided for in the user manual.
- Only use certified spare parts, in case of doubt original spare parts.
- Do not touch accessories and spare parts with wet hands.
- Always wear suitable work gloves when installing or maintaining accessories.
- Keep the appliance out of the reach of children. Children must not play with the appliance or be left unattended in the vicinity, as this could result in injury.
- The appliances contain flammable refrigerants. Maintenance and repairs may only be carried out by trained technicians.
- Read all instructions carefully to avoid improper use and the associated risk of injury.
- In the event of damage to the refrigerant circuit:
 - Avoid open flames and ignition sources, keep all types of fire and ignition sources away.
 - Ventilate the room well: Ensure that the room in which the appliance is located is thoroughly ventilated to minimise the risk of dangerous gas build-up.
- Children and persons with reduced physical, sensory or mental capabilities or lacking sufficient experience and knowledge should only use the appliance under supervision or after thorough instruction by responsible persons
- Keep packaging material out of the reach of children: Children could wrap themselves in packaging materials such as plastic bags or film or pull them over their heads, which can lead to suffocation. Therefore, make sure that packaging materials are kept out of the reach of children.
